

MANY PATHS WORLD SERVICE

October 6, 2011

TO ALL AMBASSADORS AND OBSERVERS OF THE UNITED NATIONS

The rise of consciousness in Egypt, Libya and Syria and other countries in North Africa and the Middle East courageously paved the way for the beginnings of humanity's claim to inherent rights throughout the world including America's growing Occupy Wall Street protests. This is our opportunity, as a people, to lead ourselves and our governments toward a larger worldview through the eyes of compassion informed by this expanded awareness of social responsibility and universal oneness.

You, as an appointed representative, have the platform to harness this divine and powerful energy pouring out of all regions to walk a fresh path, to craft a higher message in favor of the collective good, one that must shine into every dark corner of the globe –

We are One Life, One Humanity, One Global Family.

We value the intrinsic worth and inspired contribution of every human being.

We choose to move from fear and separation and to embrace our highest nature,
which is guided in love, acceptance and mutual respect.

This message - that we are all equal at the level of being - raises the bar for every nation, for all leaders, for each citizen. It welcomes our natural desire to meet the basic needs of all people while seizing this moment to demand from deep within our beings the right to a creative, fulfilled and meaningful existence. When these truer needs are met cooperatively and collectively, it gives everyone the capacity to live and thrive harmoniously in engaged, service-oriented and sustainable communities.

The revolts we see in the streets of our global neighbors have spilled into our own streets and the streets of other so-called Western countries. These fearless people inspire us to embark upon a personal, inner revolution where the realization of greater purpose informs our ability to finally lead with love and respect in this evolving era, the era where the ME FIRST world gives way to a WE FIRST world.

Thank you so much for your time and consideration at this historical crossroad.

Most respectfully,

Mark Jacobs
Executive Director
